PHYS 170 — Problem Set 4

Due Friday, Oct 24 · Show all work

1. Solve for x: $3x + 4 = 19$.

2. Solve for x: $5x - 2 = 13$.

3. A 5 kg block rests on a frictionless ramp inclined at 37°.
   Find the component of its weight along the ramp ($g = 9.8\ \text{m/s}^2$).

4. Find all real solutions of $x^2 - 16 = 0$.
