MATH 112 - Problem Set 4
Due Friday, Oct 24. Show all work.

1. Solve for x: 3x + 4 = 19.

2. Solve for x: 5x - 2 = 13.

3. A 5 kg block rests on a frictionless ramp inclined at 37 degrees.
   Find the component of its weight along the ramp (g = 9.8 m/s^2).

4. Find all real solutions of x^2 - 16 = 0.
   (a) Solve by factoring.
   (b) Check both answers in the original equation.
